

AADI VINODRAO MAHALLE

B.E. - Computer Science & Engineering

Ph: +91-9172778425

Email: aadimahalle5@gmail.com

Pune, Maharashtra, India - 412101

BRIEF SUMMARY

Motivated final-year Computer Engineering student with hands-on experience in software programming, database handling, and data analysis through academic projects and virtual internships. Built a Python-based Movie Recommendation System using algorithmic logic and dataset processing. Completed Android and Data Science internships, gaining exposure to application development, SQL, and problem-solving. Strong analytical mindset with curiosity to learn and contribute in R&D-oriented software roles.

TECHNICAL SKILLS

- Programming: Python, C, C++
- Database: MySQL, SQL (basic)
- Data Handling: Pandas, Data Analysis
- Development: Basic Android, HTML/CSS
- Tools: GitHub, VS Code

KEY EXPERTISE

Python | C | C++ | SQL | MySQL | Data Analysis | Basic Android Development

EDUCATION

D.Y. Patil College of Engineering, Akurdi

2022 - 2026

B.E. - Computer Science & Engineering | CGPA: 7.22 / 10

Shri. Shivaji Science college

2022

12th | MSBSHSE | Percentage: 64 / 100

Manibai Gujarati High School

2020

10th | MSBSHSE | Percentage: 89.40 / 100

INTERNSHIPS

Eduskill | IT / Computers - Software

15 Jan, 2025 - 31 Mar, 2025

Google Android Developer Intern

- Developed basic Android applications and learned application architecture
- Implemented UI components and explored backend integration concepts
- Understood software development lifecycle and debugging

Codtech IT Solutions

25 Jan, 2025 - 25 Feb, 2025

Data Scientist

- Performed data preprocessing, visualization, and basic machine learning in Python
- Used SQL for dataset querying
- Applied algorithmic thinking for predictive tasks
- Improved analytical and problem-solving skills on real datasets

PROJECTS

Movie Recommendation System

13 Feb, 2025 - 15 Mar, 2025

Key Skills: Python Pandas Scikit-learn

Project Link: <https://github.com/Aadi5678/Movies-Recommendation-System.git>

Developed a hybrid movie recommendation system using Python that combines content-based filtering and user-based collaborative filtering to generate personalized movie suggestions. Implemented cosine similarity to measure similarity between movies and user preferences. Processed and managed datasets using Pandas for data cleaning and feature extraction. Designed recommendation logic to improve accuracy by analyzing movie metadata and user behavior. Applied basic machine learning techniques using Scikit-learn to enhance prediction quality. This project strengthened my understanding of algorithms, similarity metrics, data structures, and backend data processing while improving analytical and problem-solving skills.

Technologies Used : Python, Pandas, Scikit-learn, NumPy, Recommendation Systems, Cosine Similarity, Data Processing

Smart Expense Tracker

Key Skills: Python Flask | MySQL| SQL | HTML | CSS | Backend Development | Full Stack Development | CRUD Operations

Project Link: <https://github.com/Aadi5678/SmartExpenseTracker.git>

Developed a full-stack Smart Expense Tracker web application using Python (Flask) and MySQL to manage daily financial records and provide analytics insights. Designed relational database schema and implemented complete CRUD operations for expense management. Built backend REST routes to handle data insertion, retrieval, and deletion with confirmation prompts. Implemented SQL aggregation queries to calculate total spending and category-wise expense summaries, displayed through an analytics dashboard. Created a professional SaaS-style frontend using HTML and CSS to enhance user experience. Project strengthened my understanding of backend development, database management, software architecture, and algorithmic data processing.

Technologies Used: Python, Flask, MySQL, SQL, HTML, CSS.

ASSESSMENTS / CERTIFICATIONS

Software Engineer Intern Certificate

The HackerRank Software Engineer Intern Certificate is awarded to candidates who successfully complete coding assessments designed to evaluate problem-solving, data structures, and algorithm skills. It serves as proof of technical competency for software engineering internships.

Python in Data Science

This certification is awarded after completing the course and passing the required assessments. It covers topics like Python basics, data handling, visualization, and machine learning, helping learners build essential data science skills.

NVIDIA – Fundamentals of Deep Learning

Completed the Fundamentals of Deep Learning certification by NVIDIA, gaining practical understanding of core deep learning concepts including neural networks, model training, and performance evaluation. Learned how to build and train basic deep learning models, understand data preprocessing, and apply foundational AI concepts to real-world problems. This certification strengthened knowledge of machine learning workflows and enhanced analytical thinking in AI-based applications.

Agentic AI

Successfully completed the Agentic AI for Everyone program by Progression School, gaining exposure to modern AI concepts, agent-based systems, and practical applications of generative and autonomous AI. Learned how intelligent agents interact with systems, automate tasks, and support decision-making processes. This program improved understanding of emerging AI technologies and their real-world use cases, while developing curiosity toward research-driven and innovative software solutions.

PERSONAL DETAILS

Gender: Male
Marital Status: Single
Current Address: Bhoomi Orebelle infracon, Near S. B. Patil school, Ravet, Pune, Pune, Maharashtra, India - 412101
Emails: aadimahalle5@gmail.com , aadimahalle508@gmail.com

Date of Birth: 06 Oct, 2004
Known Languages: English,Marathi, Hindi,
Permanent Address: Anju Colony, V.M.V. Road, Amravati, Amravati, Maharashtra, India - 444604
Phone Numbers: +91-9172778425, +91-8010178425
